# ARMORTEC | SEEING IS BELIEVING!

## CAMBRIDGE PAVER WITH ARMORTEC®\*

Installed in a residential driveway in June 2006

*(Photo taken January 2010)*

After many years of outstanding performance and beauty, Cambridge Pavingstones with ArmorTec® remain recognizably smooth and dense with rich color. The sustainable benefits are a result of a proven formula used in manufacturing ArmorTec® – only environmentally friendly raw materials, super fine sand granules, and cement of the highest quality.

*\*Shown is a Cambridge face mix pavingstone manufactured with ArmorTec® face mix installed in 2006.*

## PAVINGSTONE WITHOUT ARMORTEC®†

Installed in another residential driveway in November 2006

*(Photo taken January 2010)*

Without ArmorTec®, the Pavingstone will look less attractive as the sand and cement wear over time. This detracts from the appearance of the surface and contributes further to their worn look.

*\*Shown is a Cambridge through-body pavingstone intentionally manufactured without ArmorTec® face mix installed in 2006.*

## *Made in AMERICA*

.....

We are changing America's Landscape with Pavingstones and Wallstones! We want towns all over the United States to upgrade their sidewalks, downtown areas and municipalities with products that will outperform concrete and asphalt. We are allowing people to extend their living space beyond their four walls so that they can enjoy time with family and friends throughout the year. This is about something larger than a pretty driveway or patio. It is about an investment that makes people feel good about coming home or taking a walk in their local community. Our mission is to encourage positive change in the environments we utilize each and every day. We are proud to be a part of this change, one paver and one wallstone at a time.
